LP90 MOBI

The immediate appeal of the Xilence laptop car adapter is its ultracompact design. It can easily be placed in a car's glove compartment or virtually any other tight space. At the same time, it delivers reliable output power of up to 90W. This is enough to power nearly all popular laptop models. The package includes eight adapter plugs, which makes connecting devices from all the leading manufacturers a breeze. The adapter is also equipped with a USB port, which can be used to power other devices, such as an MP3 player or a mobile phone, at the same time. This makes the Xilence laptop car adapter an indispensable companion for all lengthy car trips.
